

Table Seating Guide

This template can be used as a guide to decide which table size and shape will best suit your needs.

Please remember this is just a guide, as room size, seating, table leg placement, as well as many other factors can affect the seating capacity and comfort of users.

An 84" table fits 8 comfortably, and 10 is a bit tight but totally fine for intimate friends and family dining. Don't stress!...We build to the inch, so we are able to make a custom size that meets your needs.
